Summary

Full Stack Python Developer with 4+ years of experience building scalable web applications using Python, Django, and Flask, with strong expertise in RESTful APIs, database management, and frontend integration

Tech Skills

Python

Django & Flask

Database

RESTful APIs

Linux and Dockers management

JavaScript

Skills

- Python programming for backend and data-driven applications
- Python backend development using Django, FastAPI, and Flask
- RESTful API design, development, and third-party integration
- ORM-based database interaction and backend business logic implementation
- PostgreSQL and MySQL databases, including SQL query optimization, and data migration.
- Data analysis and machine learning using Pandas, NumPy, and Scikit-learn
- Deep learning frameworks: TensorFlow, PyTorch, and Keras
- Linux server environments, Docker, deployment, and application monitoring
- AWS services and Nginx configuration
- Git and GitHub for version control and collaboration
- Client-side technologies: HTML5, CSS3, JavaScript,XML and React
- Agile / Scrum methodologies and task management tools such as Jira, and Trello.

Experience

Senior Full Stack Odoo Developer **03/06/2025**
CityArt IT Solutions –

- Designed and developed scalable Python backend services and APIs.
- Implemented business logic and data workflows using Python and ORM frameworks.
- Built and integrated RESTful APIs with external systems and services.
- Integrated backend services with third-party systems (ERP, payment gateways, external APIs).

- Improved application performance through query optimization, caching strategies, and code refactoring.
- Implemented authentication, authorization, and role-based access control in backend services.
- Used Git and GitHub for version control, code reviews, and CI workflows.

Odoo Developer

Smart Mind, Sana'a (Yemen) - 05/03/2023-- 03/02/2025

- Designed and developed Python backend modules for Odo applications.
- Implemented complex business logic using Python ORM and modular architecture.
- Developed RESTful APIs and integrated Odoo with third-party systems.
- Customized Odoo features using Python ORM, Wizards, and QWeb reports.
- Administered Linux-based servers and managed deployments.
- Used Git and GitHub for version control, collaboration, and release management.
- Contributed in designing, development, testing, and deployment of web solutions by producing detailed specifications and writing the programme code.
- Design, Develop and produce static and interactive dashboards, and reports.

INFOWIZ – Chandigarh, India
Machine Learning & Python Developer | May 2021 – Apr 2022

- Developed and productionized Python-based machine learning models, transforming data science prototypes into deployable solutions.
- Applied appropriate ML algorithms and data processing pipelines to generate accurate user recommendations.
- Implemented data mining and feature engineering using modern Python libraries.
- Processed, cleaned, validated, and maintained large datasets to ensure data integrity and analysis reliability.

Education

Lovely Professional University, Punjab, India

- Master's Degree in Machine Learning & Artificial Intelligence (2020–2022)
- Bachelor's Degree in Computer Science & Engineering (2016–2020)
